Brand: Kemmler GmbH

Order no.: 120.16.2025

**Application:**

For machining centres with synchronous spindle.

**Note:**

- Synchro tapping chucks compensate synchronisation errors.
- Minimal length compensation on compression and expansion balances very small pitch differences between synchro spindle and tap, which can cause high frictional forces on the thread flanks.
- A possible increase of axial force during the tapping process is reduced to a minimum.
- Suitable for internal coolant.
- Coolant pressure up to max. 100 bar.

With balanced clamping nut
